

FORSTHOFF-DB

Powerful webbing welder for 50 mm webbing

Highlights

- **For welding thermoplastic bands and webbing**
- **Powerful band welder**
- **Speed and temperature control via potentiometer**
- **With accessories for reinforcement and anti-vandalism bands**

Description

The Forsthoff-DB webbing welder is a very powerful automatic welder for applying 50 mm webbing. With additional accessories it can be used for welding reinforcement and anti-vandalism bands.

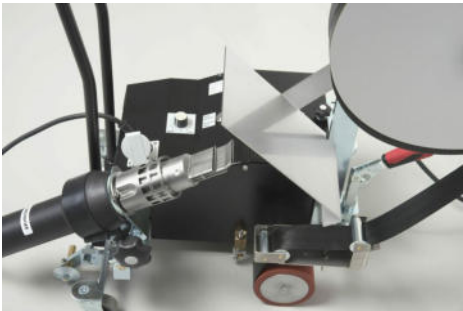

The hot-air machine has a heating power of 4000 W 230 V AC, continuously electronically adjustable up to 700 °C. The travel unit is equipped with a strong motor and heavy housing, ensuring a brisk drive and strong pressure. The machine starts automatically after the welding head is swung in.

In addition, the machine housing is mounted on a three-point support that compensates for small unevenness in the welding surface. This is additionally reinforced by the weight integrated into the housing of the Forsthoff-DB machine, which can be removed if required.

The Forsthoff-DB reliably welds on webbing of 50 mm width. The mounted strong Oval-AB hot-air blower produces a strong air output of 360 litres/minute. In addition, the Forsthoff-DB machine features an advanced geared motor made in Germany. The heat shield further enhances the generously dimensioned unwinding device of the Forsthoff-DB machine and prevents the webbing spool from heating up and deforming.

Technical data

Voltage	230V; 120V
Power	4000W 230V; 2200W 120V
Frequency	50/60 Hz
Temperature	20 – 700 °C
Band width	50 mm webbing
Air volume	360 l/min (Oval-AB blower)
Dimensions	Length 520 mm, width 385 mm, height 760 mm (without guide handle)
Weight	36.8 kg incl. weight and handle
Conformity marks	CE; EAC
Protection class	II
