

FORSTHOFF-P

Robust tarpaulin welder for tarpaulin processors and master saddlers

Highlights

- **Ideal automatic welder for tarpaulin processors and master saddlers**
- **Robust design, reliable and operator-friendly**
- **Usable on table and floor**
- **With accessories for overlap, hem, welt and band welding**

Description

The FORSTHOFF-P automatic welder is ideal for overlap, hem and welt welding. Available for 20 mm, 30 mm, 40 mm and 45 mm wide weld seams.

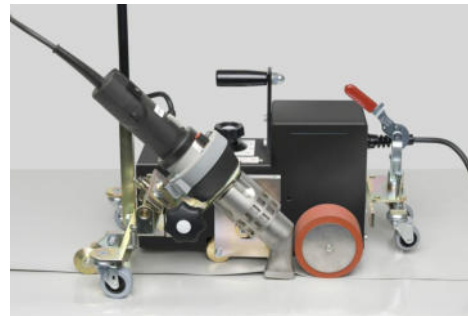

The Forsthoff-P automatic welder is the efficient and agile welder for welding truck tarpaulins, tents and awning fabrics. It produces overlap seams of 20, 30, 40 or 45 mm and can also be converted for welding in welt cords. In addition, the machine can easily be used with a hem-welding accessory to produce hems of 20 mm and 30 mm and of 40 mm and 45 mm.

The heating power of up to 4000 W 230 V AC is continuously adjustable from 20 to 700 °C and can thus be individually matched to the different materials. A secure pressure on the tarpaulin is also provided by a three-point support. Thanks to a new generation of nozzles, tarpaulin fabrics can be welded at a speed of up to 11 metres/minute.

The tarpaulin welder also has a sturdy carrying handle and a comfortable guide handle. The agile and slim housing design makes the Forsthoff-P ideal for use in the vehicle-tarpaulin sector.

Technical data

Voltage	230V; 120V
Power	3300W, 3500W, 4000W 230V; 2200W 120V
Frequency	50/60 Hz
Temperature	20 – 700 °C
Weld seam width	20, 30, 40, 45 mm
Welding speed	up to 11 m/min
Dimensions	Length 590 mm, width 220 mm, height 290 mm (without guide handle)
Weight	19.5 kg with connection cable, without handle
Conformity marks	CE; EAC
Protection class	II

FORSTHOFF-P
